Professional Training

Using our extensive experience, we created professional accounting seminars, through which we transfer our experience to the young people who would like to enter the profession, essentially connecting theory to practice.

For this reason we have created and offer a list of 21 seminars with the purpose of creating executives of high professional acclaim, capable of meeting even the most demanding business demands.

Our Company

We welcome you to the training center of Power-Tax-Training , the new Larger Training Center in the Northern Suburbs of Athens, offering innovative professional training services to dynamic specializations of professional success at the most competitive prices.

The executives of Power – Tax – Training, with great experience in the field of accounting (with the Parent company of our Group being Accounting Firm E.F.M., www.efm.gr) organize accounting and tax consultancy seminars at their facilities in Maroussi, with the primary goal to adequately train and educate the following:

1. Graduates of Lyceum, Technical Education Center, Technical Vocational Lyceum
2. Graduates of Economics schools
3. Students with an economics orientation
4. Graduates of Private Schools – IEK with an economics Orientation
5. Entrepreneurs

Using the most advanced technological equipment, the latest teaching aids and the most modern and ergonomic furniture, we have created educational spaces, with the most advanced aesthetics and design, placing as first priority the safety and protection of our students.

Power-Tax-Training

Our Company

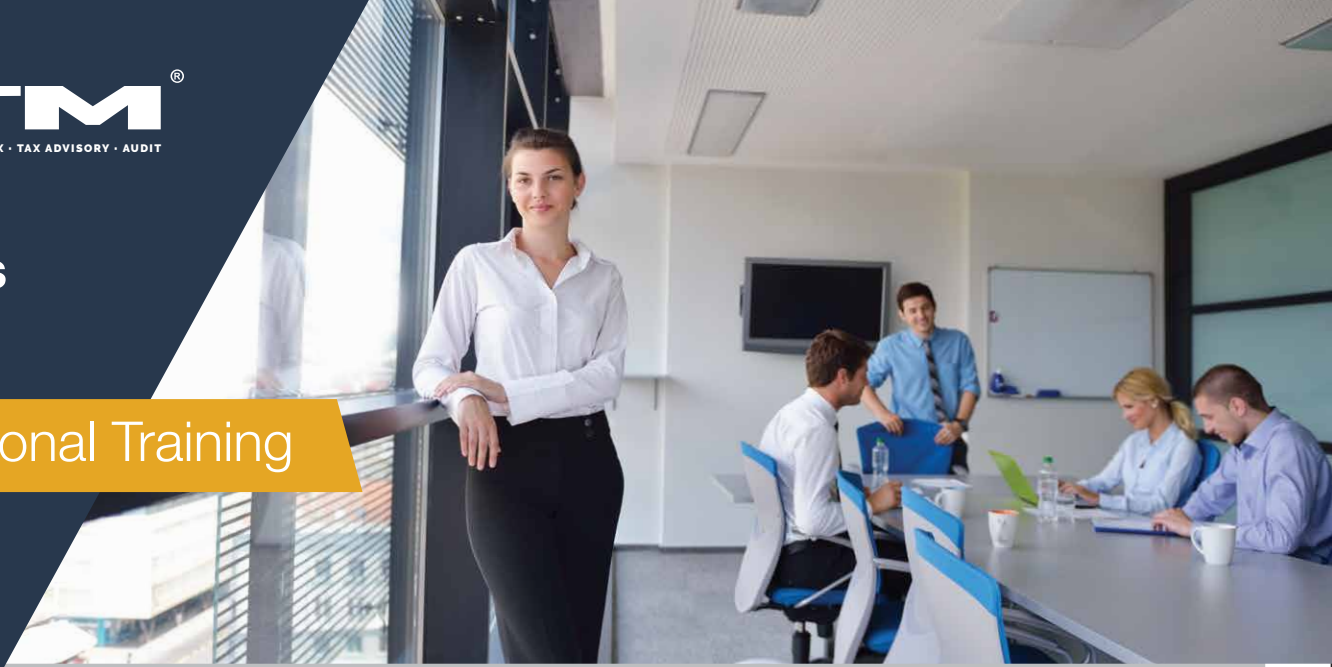

We ensure that trainees will receive Practical Training and at the same time we actively promote their professional placement through our Consultation and Career Office. Visit our facilities to see the workshops and equipment, meet our people and become acquainted with our educational philosophy and discover why it is worth coming to Power-Tax-Training.

We ensure in the most efficient manner that our graduates enter the labour market, aiming at their professional placement, since we provide a personal guarantee of their suitability to Companies and Organizations.

Our graduates acquire professional knowledge and skills, which provide them with comparative advantages in the professional market and they are sought out by Businesses and Organizations.

The administrative and educational staff is always there for the trainees, even after the end of the training, to advise, assist and solve problems.

We develop collaborations with the most important businesses in each sector who seek employees from among our graduates.
